

INTELLIGENT RESURFACING

Harness the power of data within your machine. Monitor consumption and optimize performance with predictive insight and resource management.

ZAMBONI
CONNECT

 Access to your machine-specific maintenance materials is enhanced by automated preventative maintenance reminders.

 Data points include fuel / electric consumption, ice-making water use and additional information which impacts efficiency and performance.

 Works with your facility's WiFi network to communicate data from your machine to the Zamboni Connect system.

WiFi Requirements: WiFi router with a minimum signal strength of -70 dBm and is compliant with IEEE 802.11 b/g/n. A dedicated router for Zamboni Connect™ system is recommended. Best location for router installation is in machine storage room, or line of sight to machine storage room or ice pad.

This brochure has been prepared only as a general guide for the customer. Every effort has been made to assure that the information presented is correct. Some features described or shown may be optional at extra cost. This option may not be available for all machine models. Prices, colors, materials, specifications and models are subject to change. For current product information, please contact the Zamboni Company.

PREDICTIVE MAINTENANCE

Automated reminders keep you ahead of maintenance tasks. A collaborative digital maintenance log provides your team with a central point for communication and documentation.

RESOURCE MANAGEMENT

Monitor and evaluate detailed results of your fuel / electric / water consumption for opportunities to conserve resources and money. Fleet managers can compare group data to identify potential savings.

CUSTOMIZED REPORTING

Use a wide variety of data points to develop custom spreadsheets and reports suited to your facility's needs. Identify trends in consumption and performance to forecast maintenance and service needs.

CONSTANT ACCESS

Zamboni Connect™ is accessible on demand around the clock on web and mobile (iOS and Android).

NOTIFICATIONS AND DTC ALERTS

Customized settings for notifications allow you the choice of team or individual alerts for potential show-stopping issues. Push notifications can be set to deliver diagnostic trouble codes to email and mobile devices.

ADDITIONAL RESOURCES

Videos, parts lists, maintenance schedules, service manuals and more create the toolbox your team needs to safely and efficiently operate your resurfacing equipment.
